

DMK-ERP's Distributed Operations Architecture

DMK-ERP's Distributed Operations Architecture caters for a variety of store operating conditions allowing for real-time or scheduled transaction updates enabling managers to view the *entire* retail value chain. Further, DMK-ERP's operating design has the following features:

- Redundant operations protecting the trade operations
- Simple to add stores
- Brand transparent
- Real-time, or near real-time conditions enabling true stock visibility
- Promotion and mark down updates directly from head office
- Highly flexible to accommodate future business changes and reporting requirements
