

The Retailer's all in one solution turning your transaction data into actionable information:
Real-time

The Solution: DMK-ERP Financials

DMK-ERP is a single web enabled ERP solution designed for the retailer and the retail manufacturer/distributor. DMK-ERP includes a powerful, separately available, Financial component which includes:

- Full transaction traceability and drill-down
- Distributed multi-company/branch control
- Detailed security authorizations and password management
- Remote query/reprint of transactions
- Multi currency and branch banking
- Fixed asset and depreciation
- WIP
- Concurrent GAAP & IFRS reporting
- Disparate reporting periods
- Full accounting functionality
- Integration to DMK-ERP

Business Intelligence:

DMK-ERP Financials is a BI tool that allows analysis of real-time transactions, reports, variables and ratios across the multi location environment.

Architecture:

DMK-ERP Financials is built using industry standard tools and results in a cost-effective and stable value added solution..

The Retailer:

The DMK-ERP Financial component fits with any retailer who has complex processes including multiple:

- Currencies
- Brands
- Companies
- Calendars
- Languages
- Retail segments

Management Tool:

DMK-ERP has a single driving focus: efficiently turning your transaction data into actionable information, across the enterprise— real-time, directly from DMK-ERP Financials.

DMK-ERP allows managers to be proactive with real-time BI information solving problems and increasing profitability by managing the exception rather than the rule.

WE THINK THEREFORE YOU CAN
