

The Solution: DMK-ERP Store Operations

Developed for retail, DMK-ERP POS includes a powerful, separately available, web enabled Point of sales/service component which includes:

- All traditional POS features including quotation management
- Customer relationship/loyalty programs
- Manage account customers with interface to credit limit/availability solution
- Transparency to warehouse for management of centralized and/or supplier deliveries.
- Integrated business process that allows for automated reconciliation of transactions between HO and off line POS
- Manage Pre-Sales (lay byes)
- Automated stock reconciliation
- Caters for off-line architecture
- Kiosk compatible
- PCI compliant ready
- Full integration to ERP packages

The Retailer:

The DMK-ERP POS components fit with any retailer who has complex processes including multiple:

- Sales and delivery methods
- Currencies & banking control
- Brands & locations
- Corporate owned or franchised

Management Tool:

DMK-ERP POS has a single driving focus: efficiently turning your transaction data into actionable information, across the enterprise— real-time, directly from the DMK-ERP POS.

DMK-ERP allows managers to be proactive with real-time information solving problems and increasing profitability by managing the exception rather than rule.

Business Intelligence:

All store transactions can automatically synchronize to HO on a real time or scheduled basis allowing for a “one version” of the truth solution with powerful reporting and analytics.

DMK-ERP POS can be also be integrated with the DMK –ERP suite providing true stock transparency and analytics across the entire retail value chain.

WE THINK THEREFORE YOU CAN
